Specialist Representation

“The complexity of many projects now means that they simply wouldn't get built without specialists.”

Get ready to grab your share of the low carbon opportunity

Impending government legislation makes the need to cut carbon in construction inevitable. But with change comes opportunity. New technologies, new ideas and new ways of working will all play a part. So it pays to act first. Think about how your business can grab a slice of the action. Get thinking. Get cutting. And get ahead.

YOUR NSCC

The National Specialist Contractors' Council (NSCC) brings together the common aims of specialist trade organisations within the construction industry and is the authoritative voice of Specialist Contractors in the UK.

NSCC is recognised as the first point of contact for Specialist Contractors by a host of leading organisations including:

- Construction Skills Certification Scheme (CSCS)
- ConstructionSkills
- Cross-Industry Construction Apprenticeship Task Force (CCATF)
- Health and Safety Executive (HSE)
- The Joint Contracts Tribunal (JCT)
- Safety Schemes in Procurement (SSIP) Forum
- Strategic Forum for Construction.

By focussing on key business issues, NSCC is able to provide advice and support to its Specialist Contractors, ensuring that they are uniquely placed to deliver quality, best value and integrated solutions to their clients.

YOUR industry

The construction industry accounts for almost 10% of GDP, employs 3 million people and generates £2.84 in economic activity for every £1 invested in the sector. Creating an efficient and vibrant industry, in which all members of the supply chain can flourish, is therefore vital to the long-term success of the UK economy.

Implementing **fair payment** through the supply chain benefits everyone involved in the construction process. Clients and designers are able to achieve their vision, contractors to deliver projects to budget and programme, and Specialist Contractors and manufacturers to develop innovative and cost effective solutions.

The Fair Payment Campaign, launched by NSCC, has the objective of achieving proper and timely payment through the supply chain to **improve your cashflow**.

Reducing the cost, bureaucracy and waste associated with **pre-qualification** is essential if the industry is to operate more efficiently and realise integrated and streamlined project solutions.

The Builder's Profile, working in partnership with NSCC, and the Safety Schemes in Procurement (SSIP) Forum both offer practical ways to exchange pre-qualification information, assess competence and **increase your efficiency**.

The future of the industry is dependent upon employers investing in the **training** and qualification of the workforce. The construction sector directly employs a diverse range of people with the ability to improve the built environment around us.

The introduction of new qualifications, including apprenticeships for the specialist sector, is being driven by NSCC working closely with ConstructionSkills enabling you to **develop your skills.**

The focus on the **low carbon agenda** impacts on every aspect of the construction process including the materials sourced, the building processes used on site and the end product. The industry has a central role to play in meeting the UK target of an 80% reduction in carbon emissions by 2050 by improving the energy efficiency of the buildings in which we live and work.

NSCC is committed to helping the industry to reduce carbon emissions by providing guidance and sharing best practice which will allow you to **invest in your future.**
